

## Overall Structure

January 2014

# What is Horizon 2020?

Research and Innovation Services

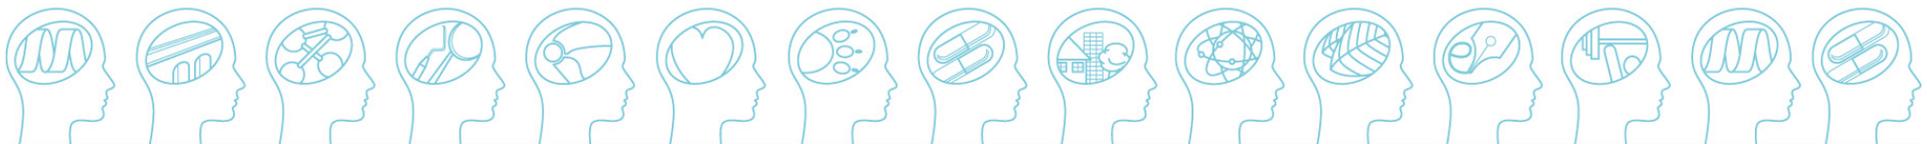

**80 billion euro research and innovation funding programme (2014-2020)**

**Responding to the economic crisis to invest in future jobs and growth**

**Addressing people's concerns about their livelihoods, safety and environment**

**Strengthening the EU's global position in research, innovation and technology**

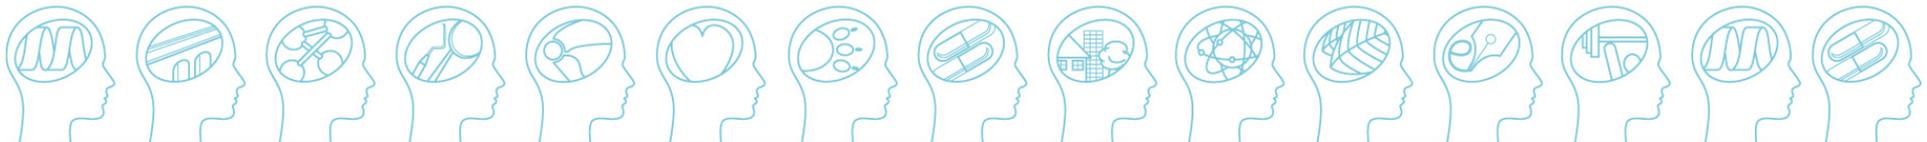

THINKING THAT SHAPES THE FUTURE  
The University of Dundee: creating world class technologies

# Horizon 2020 – What is new?

Research and Innovation Services

- **A single programme** bringing together three separate programmes
- **Coupling research to innovation**– from research to retail, all forms of innovation
- **Focus on societal challenges** facing EU society, e.g. health, clean energy and security
- **Simplified access**, for **all companies**, universities, institutes in all EU countries and beyond.
- **New simplified financial model** - 100% of eligible costs, Flat rate 25% for overheads
- **Stronger industry and innovation focus**

THINKING THAT SHAPES THE FUTURE  
The University of Dundee: creating world class technologies

# Horizon 2020 – Structure

Research and Innovation Services

## Excellent Science

European Research Council (ERC)

Marie Skłodowska Curie Actions (MSCA)

Future and Emerging Technologies

Research Infrastructures

## Industrial Leadership

Leadership in Enabling and Industrial Technologies (LEIT) – ICT, KETs, Space

Access to risk finance

Innovation in SMEs  
Bottom up

## Societal Challenges

Health and Wellbeing

Food Security

Transport

Energy

Climate Action

Societies

Security

Bottom Up

Open to all areas of science and technology  
Research career focus

Top Down

Bridging the valley of death  
Industry and innovation focus  
PPPs/JUs/JTIs

Top Down

Addressing EU concerns  
Research priorities

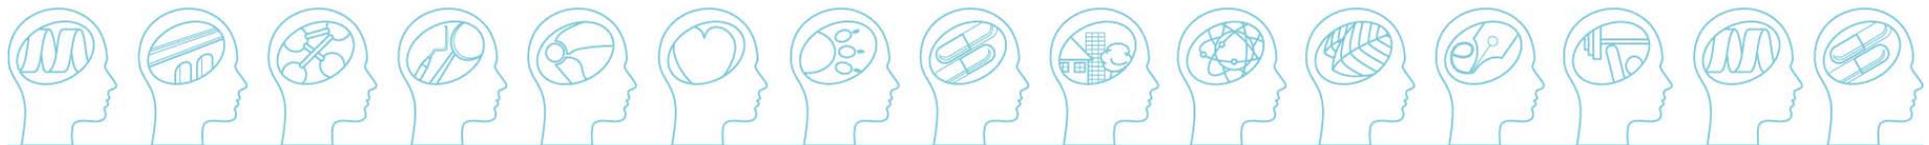

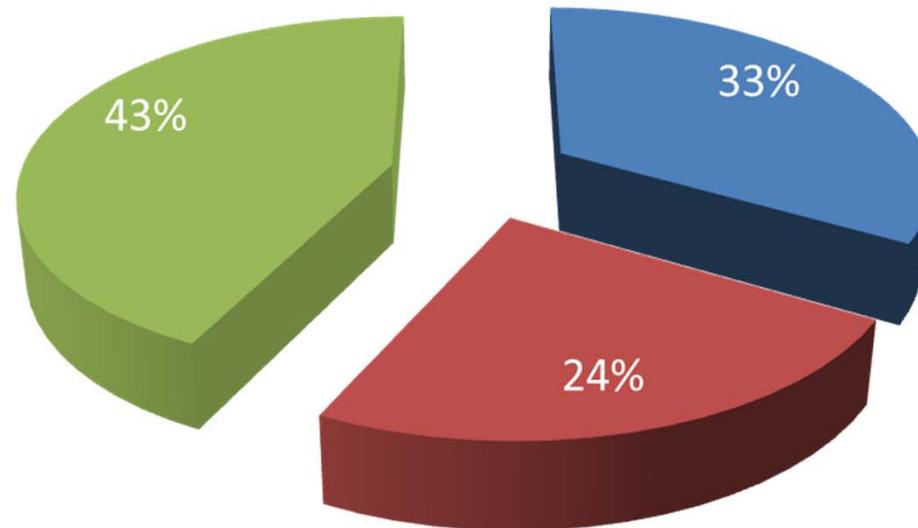

# Horizon 2020 – Structure

Research and Innovation Services

## H2020 Budget by Priorities

- 1. Excellent Science
- 2. Industrial Leadership
- 3. Societal Challenges

THINKING THAT SHAPES THE FUTURE  
The University of Dundee: creating world class technologies

# Horizon 2020 – Excellent Science European Research Council

Research and Innovation Services

## Excellent Science

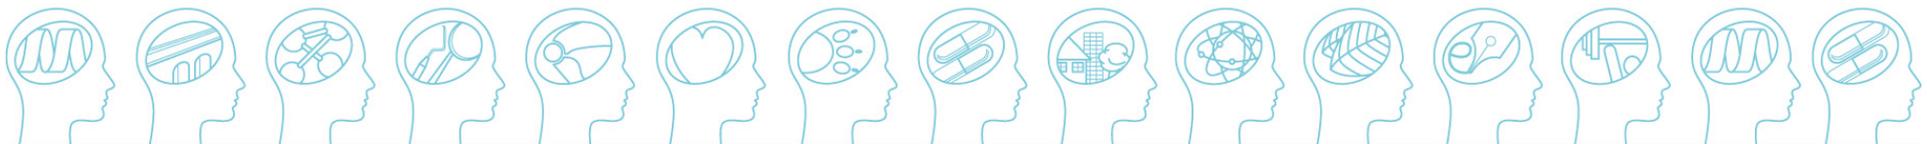

European Research  
Council (ERC)

Marie Skłodowska Curie  
Actions (MSCA)

Future and Emerging  
Technologies

Research Infrastructures

- Mostly unchanged from FP7
- The European Research Council (ERC) provides funding for excellent researchers at different stages of their career.
  - Starting Grants
  - Consolidator Grants
  - Advanced Investigator Grants
  - ERC Proof of Concept

THINKING THAT SHAPES THE FUTURE  
The University of Dundee: creating world class technologies

# Horizon 2020 – Excellent Science Marie Skłodowska Curie Actions

Research and Innovation Services

## Excellent Science

European Research Council (ERC)

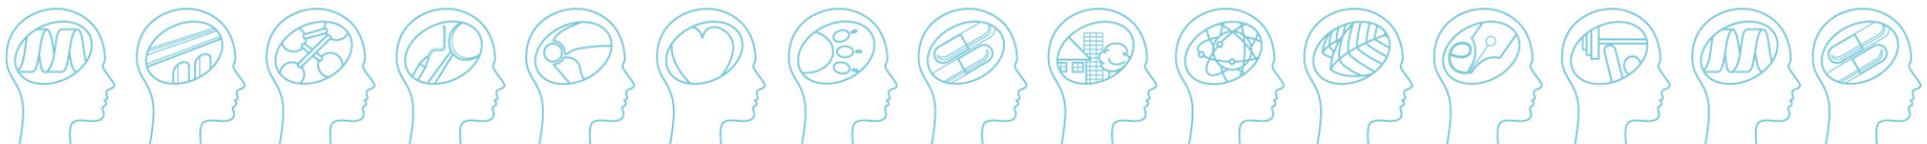

Marie Skłodowska Curie Actions (MSCA)

Future and Emerging Technologies

Research Infrastructures

MSCA fund mobility, training and career development in academia, industry and other non-academic sectors through individual mobility grants and projects.

- Innovative Training Networks (ITNs)
  - European Training Networks (ETN)
  - European Industrial Doctorates (EID)
  - Joint Doctorates (EJD)
  - 1<sup>st</sup> deadline April 2014
- Individual Fellowships (IF)
  - 1st deadline April 2014
- Co-funding (COFUND)
  - 1<sup>st</sup> deadline Nov 2014

THINKING THAT SHAPES THE FUTURE

# Horizon 2020 – Excellent Science Marie Skłodowska Curie Actions

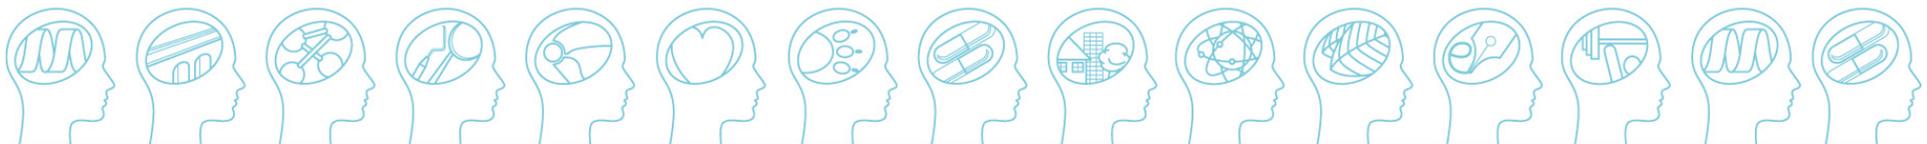

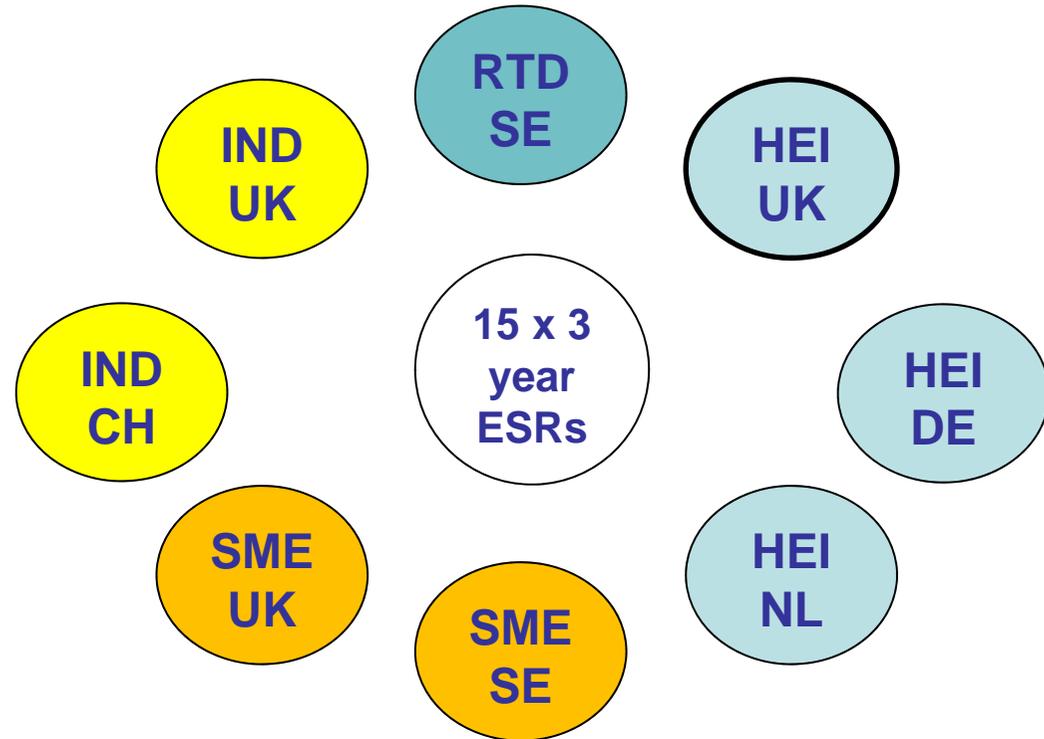

Research and Innovation Services

## European Training Networks (ETN)

**Excellent Science**

- European Research Council (ERC)
- Marie Skłodowska Curie Actions (MSCA)
- Future and Emerging Technologies
- Research Infrastructures

THINKING THAT SHAPES THE FUTURE  
The University of Dundee: creating world class technologies

# Horizon 2020 – Excellent Science Marie Skłodowska Curie Actions

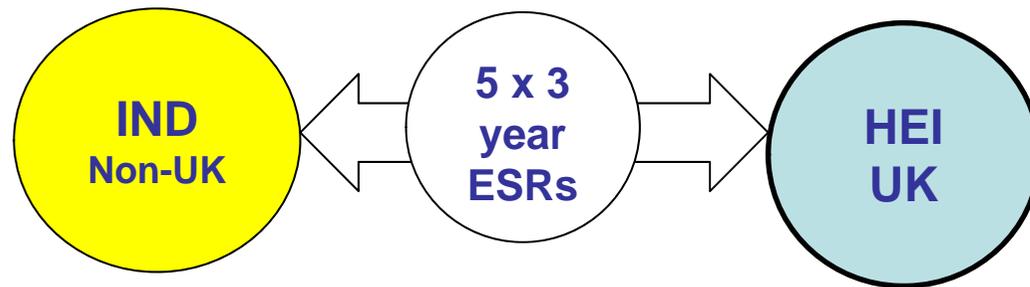

Research and Innovation Services

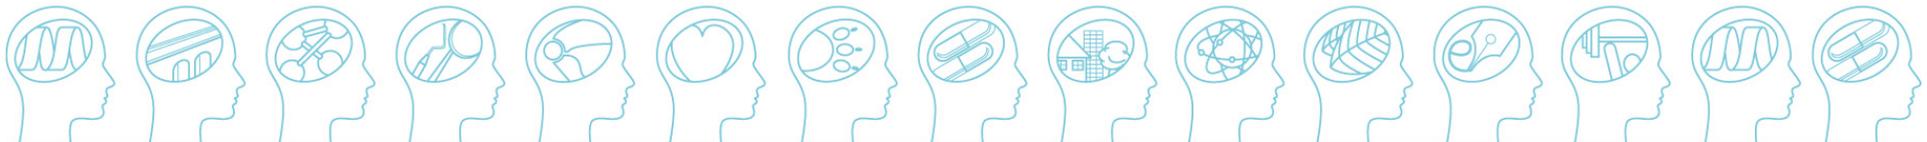

## European Industrial Doctorates (EID)

**Excellent Science**

- European Research Council (ERC)
- Marie Skłodowska Curie Actions (MSCA)
- Future and Emerging Technologies
- Research Infrastructures

Researchers in EID shall spend at least 50% of their time in the non-academic sector

# Horizon 2020 – Excellent Science Marie Skłodowska Curie Actions

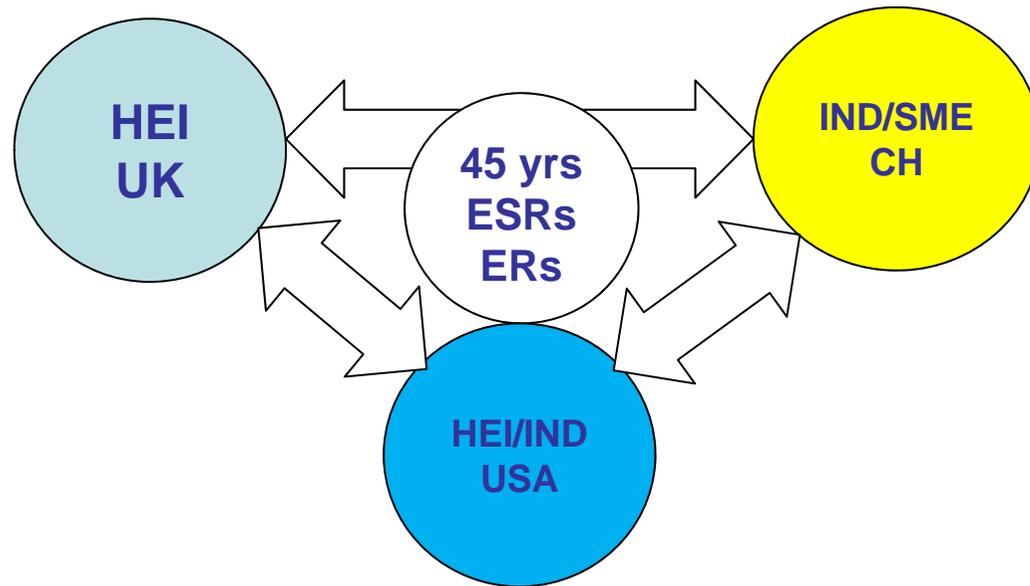

Research and Innovation Services

## Research and Innovation Staff Exchange (RISE)

**Excellent Science**

- European Research Council (ERC)
- Marie Skłodowska Curie Actions (MSCA)
- Future and Emerging Technologies
- Research Infrastructures

The RISE scheme will promote international and inter-sector collaboration through research and innovation staff exchanges.

European Research  
Council (ERC)

Marie Skłodowska Curie  
Actions (MSCA)

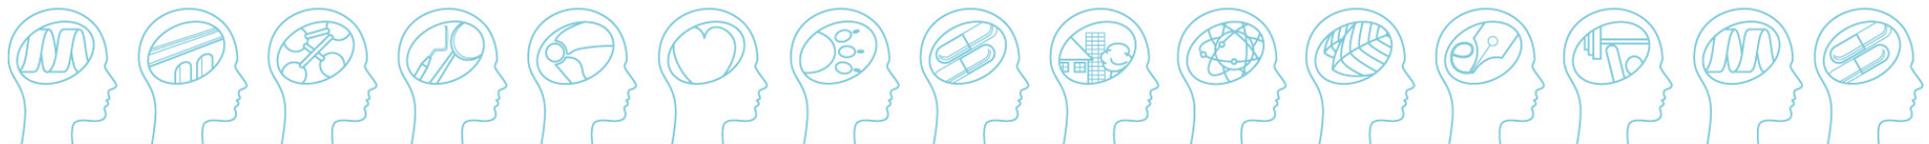

Future and Emerging  
Technologies

Research Infrastructures

NEW for H2020 Future and Emerging Technologies (FET) aims for **radically new technologies** by exploring **novel and high risk ideas** building on scientific foundations.

**Driven by excellence** and extends to exploring pre-competitive ideas for shaping the future of technology, enabling society to benefit from **multi-disciplinary research collaboration** that needs to be engaged at European level by making the **link between research driven by science and research driven by societal challenges or by industrial competitiveness**.

It promotes **research beyond what is known**, accepted or widely adopted and fosters **novel and visionary thinking** to open promising paths towards powerful new technologies which could develop into technological and intellectual paradigms for the decades ahead.

THINKING THAT SHAPES THE FUTURE  
The University of Dundee: creating world class technologies

# H2020 Priority 1 – Excellence Future and Emerging Technologies

Research and Innovation Services

Three schemes:

- **FET Open**

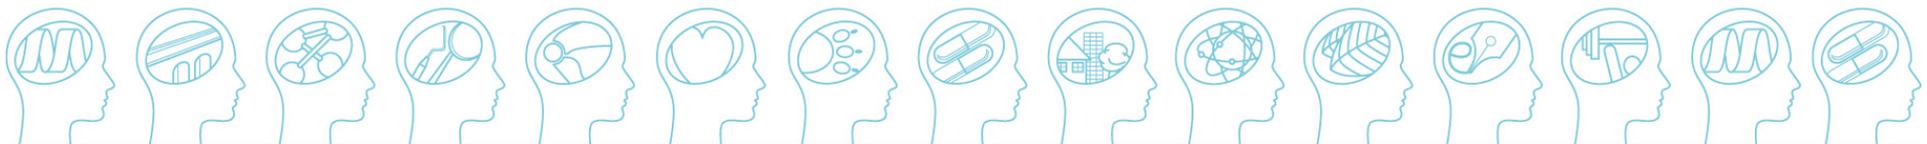

- Supports embryonic science and technology research exploring new foundations for radically new future technologies by challenging current paradigm's and venturing into unknown areas. A **bottom-up selection process widely open to any research ideas** shall build up a diverse portfolio of targeted projects. Early detection of promising new areas, developments and trends, along with **attracting new and high-potential research and innovation players**, will be key.

- **FET Proactive**

- Nurture emerging themes and communities by addressing a number of **promising exploratory research themes** with the **potential to generate a critical mass of inter-related projects** that, together, make up a broad and multifaceted exploration of the themes and building a European pool of knowledge.

- **FET Flagships**

- Supports **ambitious large-scale, science-driven research** aimed at grand interdisciplinary S&T challenges. Such activities will benefit from the alignment of European and national agendas, and provide a strong and broad basis for future technological innovation and economic application in a variety of areas, as well as novel benefits for society.

# Horizon 2020 – Excellent Science Research Infrastructures

Research and Innovation Services

## Excellent Science

European Research Council (ERC)

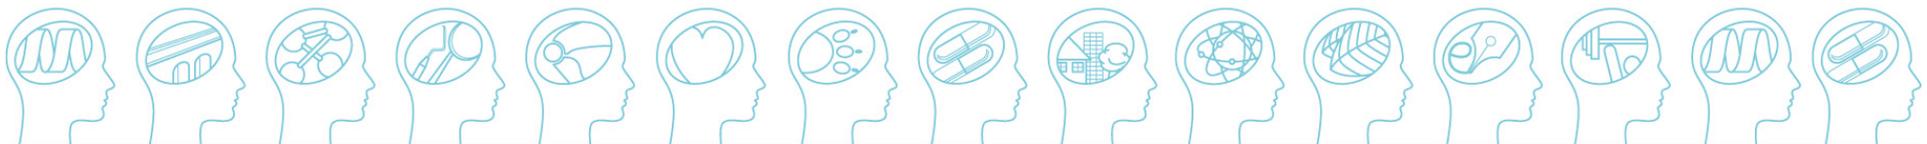

Marie Skłodowska Curie Actions (MSCA)

Future and Emerging Technologies

**Research Infrastructures**

An increased budget, from around €1.7 billion (FP7) to €2.5 billion (Horizon 2020)

- New activities to support the implementation and operation of world-class infrastructures such as ESFRI infrastructures
- Continuation of the successful FP7 Integrating Activities
- Reinforcement of the support to e-infrastructures
- New objective of better exploiting the innovation potential and human capital of infrastructures

THINKING THAT SHAPES THE FUTURE  
The University of Dundee: creating world class technologies

# Horizon 2020 – Societal Challenges

Research and Innovation Services

## Societal Challenges

Health and Wellbeing

Food Security

Transport

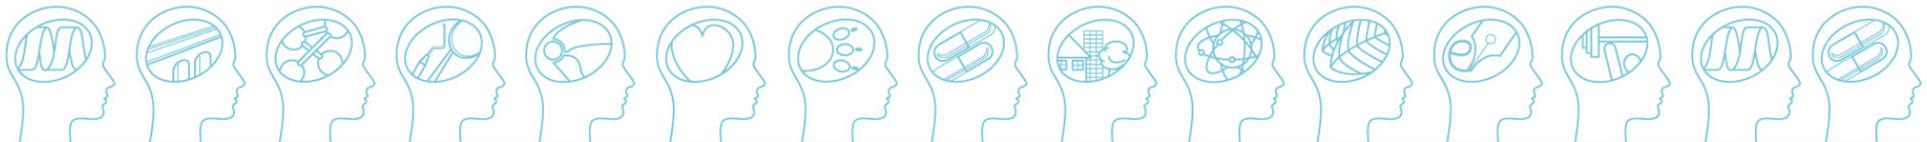

Energy

Climate Action

Societies

Security

- Funding under this priority is predominantly for collaborative projects, following a top-down approach with two-year work programmes of defined, challenge-based topics.
- A minimum of three legal entities from three EU Member States participate in these projects.
- Given that the overall aim of this priority is to tackle Societal Challenges, most projects will require a broader approach in terms of disciplines and likely to require the inclusion of different stakeholders.
- All challenges will identify areas where input from SSH is relevant.

THINKING THAT SHAPES THE FUTURE

Climate Action

Societies

**Security**

## Secure societies challenge

1. Fight against crime and terrorism
2. Disaster Resilient Societies
3. Border Security
4. Digital Security

## Societal Challenges

Health and Wellbeing

Food Security

Transport

Energy

Climate Action

Societies

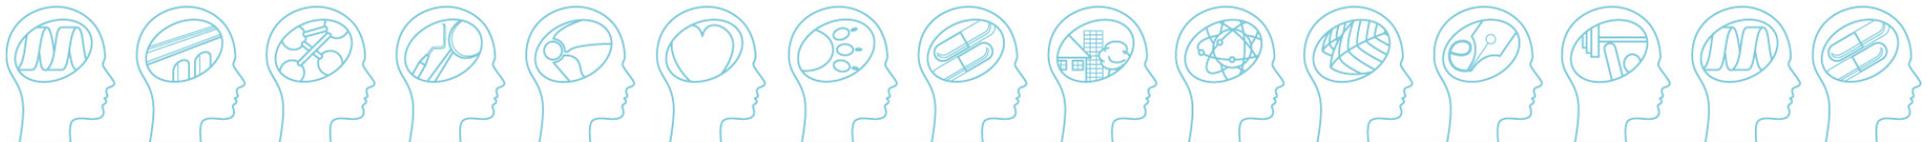

**Security**

## 1. Fight against crime and terrorism

The ambition of this call is both to avoid an incident and to mitigate its potential consequences. This requires new technologies and capabilities for fighting and preventing crime (including cyber-crime), illegal trafficking and terrorism (including cyber-terrorism), including understanding and tackling terrorist ideas and beliefs to also avoid aviation related threats.

This call is divided in four parts:

1. Forensics
2. Law enforcement capabilities
3. Urban security
4. Ethical/societal dimension

## Societal Challenges

Health and Wellbeing

Food Security

Transport

Energy

Climate Action

Societies

**Security**

## 2. Disaster Resilient Societies

The objective of this call is to reduce the loss of human life, environmental, economic and material damage from natural and man-made disasters, including from extreme weather events, crime and terrorism threats.

This area will therefore focus on developing technologies and running large-scale demonstration with a view to:

1. Crisis Management and Civil protection
2. Disaster Resilience and Climate Change
3. Critical Infrastructure Protection (cyber crime, cyber terrorism)
4. Communication Interoperability facilitating disaster management
5. Ethical/Societal Dimension.

## Societal Challenges

Health and Wellbeing

Food Security

Transport

Energy

Climate Action

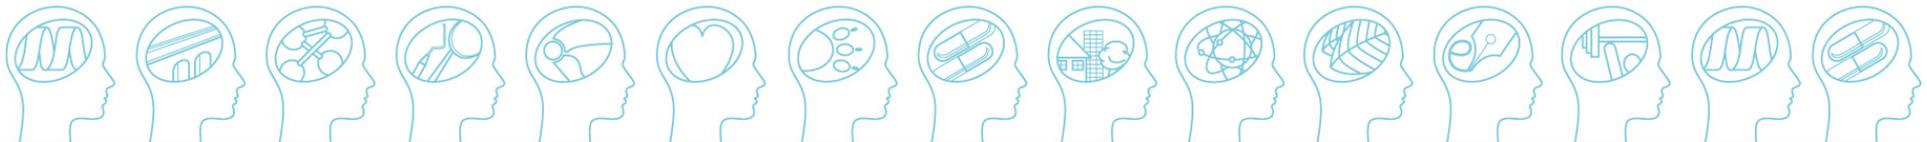

Societies

**Security**

### 3. Border Security

This call targets the development of technologies and capabilities which are required to enhance systems, equipment, tools, processes, and methods for rapid identification to improve border security.

This call also focuses on new technologies, capabilities and solutions which are required to support the Union's external security policies in civilian tasks, ranging from civil protection to humanitarian relief, border management or peace-keeping and post-crisis stabilisation, including conflict prevention, peace-building and mediation.

## Societal Challenges

Health and Wellbeing

Food Security

Transport

Energy

Climate Action

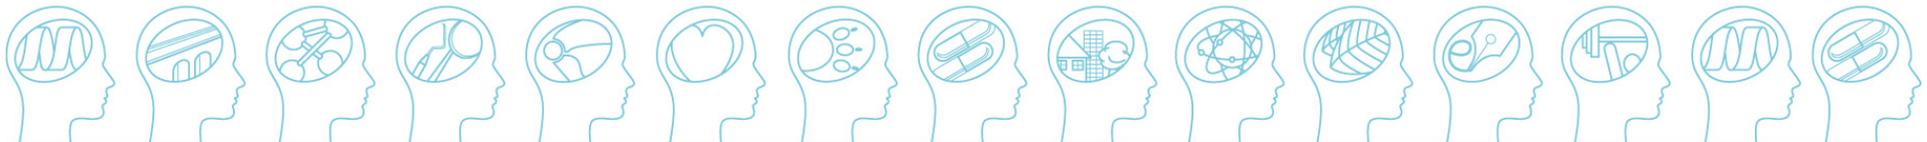

Societies

**Security**

## 3. Border Security

This call is divided in the following parts:

- Maritime Border Security
- Border Crossing Points
- Supply Chain Security
- Information Management in the context of External Security
- Conflict Prevention and Peace Building
- Ethical/Societal Dimension.

## Societal Challenges

Health and Wellbeing

Food Security

Transport

Energy

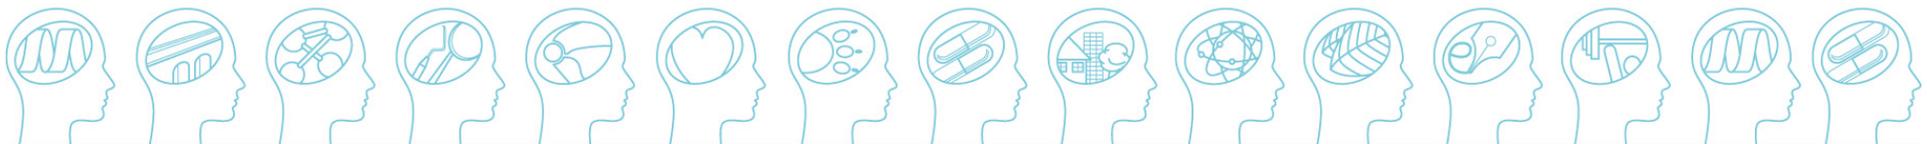

Climate Action

Societies

**Security**

## 4. Digital Security

This Call will focus on demonstrating the viability and maturity of state-of-the-art security solutions that have been tested in a laboratory environment. The intention is that after this validation phase they will find a wide up take in the market. Proving that the security concepts, processes and solutions work in a real life environment, in large scale demonstrators and directly involving end users who would ultimately benefit the most from the outcome, should increase the prospects for an ICT security market and demonstrate the validity and effectiveness of security. This in turn will reduce the risks of a negative economic impact due to a cyber-incident.

# Horizon 2020 – Societal Challenges
